

AHMAD AFANDI

Sidoarjo, Jawa Timur | [linkedin.com/in/ahmad-afandii](https://www.linkedin.com/in/ahmad-afandii) | +62 812-1744-1769 | ahmad.afandi.cv@gmail.com

I'm Ahmad Afandi, a Software Engineering graduate from SMK ANTARTIKA 2 Sidoarjo with 3 years of experience. During my studies, I was actively involved in the Club RPL organization as a **mentor** and completed an internship as a **Web Developer** at CV Purnama Kreatifa for 4 months. From the experience, I've developed a deep expertise in building Backend architectures, performing complex code debugging, and designing Frontend interfaces. I also have a strong interest in ERD design and database management to ensure system efficiency. My career goal is to apply my skills to contribute positively to organizations while pursuing my passion for web development.

EDUCATION

SMK Antartika 2 Sidoarjo

Software Engineering (Rekayasa Perangkat Lunak)

Sidoarjo, Indonesia

June 2023 - May 2026

- Final Grade 90,5/100 – Field: Software Engineering
- Relevant Subjects: Web Programming, Basis Data, Application Programming, Object Oriented Programming, Programming: PHP, Javascript, Golang, Java.

WORK EXPERIENCE

Web Development Intern

CV Purnama Kreatifa (kreatifa.com)

Sidoarjo, Indonesia

January – May 2025

- Developed and maintained an E-Procurement ERP application using CodeIgniter 3 and PostgreSQL, focusing on robust back-end logic and data integrity.
- Analyzed and optimized ERD (Entity Relationship Diagrams), including creating new tables and modifying column structures to meet complex business requirements.
- Collaborative Team Worked within a 6-person development team using Git/GitHub for version control, ensuring smooth code integration and conflict resolution.
- Performed rigorous debugging and system analysis to identify bottlenecks, fix functional bugs, and improve overall web application performance.

ORGANIZATIONAL EXPERIENCE

CLUB RPL – SMK Antartika 2 Sidoarjo

Web Development Mentor

Sidoarjo, Indonesia

July - November 2025

- Selected as a Mentor to facilitate and instruct junior students in web development fundamentals and advanced programming logic.
- Evaluated student code for best practices, ensuring clean code structure and effective database implementation.
- Developed comprehensive learning modules for Web Development, covering HTML, CSS, JavaScript, and PHP/MySQL to enhance students' technical skills.

HONOR AND AWARDS

FITCOM Web Programming Competition, Universitas Dinamika Surabaya

August 2024

Selected as one of the finalists from 30 web programming competition participants from all high school/vocational school/Islamic high school students in Indonesia.

Jagoan Hosting Infra Competition Semi Finalist, Jagoan Hosting

Nov 2025

Passed the preliminary round and national level technical bootcamp at the Jagoan Hosting Infra Competition (JHIC) as a semi-finalist.

Jagoan Hosting Infra Competition Top 30 National Team, Jagoan Hosting

Nov 2025

Selected as a Top 30 National Finalist in the Jagoan Hosting Infra Competition (JHIC) 2025 after previously qualifying as a National Semi-Finalist. Successfully outperforming more than 1,200 student participants in the Indonesian cloud infrastructure design competition.

PROJECTS & PORTFOLIO

News Website Application

February 2026

A self-developed project. Here's my job description:

- Designing a database schema using an ERD to ensure data integrity and optimize query performance.
- Implementing a Modular Monolith Architecture and GORM for better code structure and scalability.
- Developed a full-stack dynamic news platform using **Golang (Gin)** for the backend and **PostgreSQL** for the database.
- Designed and implemented a **RESTful API** to ensure seamless data communication between the server and the frontend.
- Presenting project.

Distro Zone E-Commerce

Jan 2026

A self-designed project for LSP (a professional certification body). Here's my job description:

- Design a database schema using ERD to ensure data integrity and optimize query performance.
- Implement Clean Architecture and GORM for better code structure and scalability.
- Implemented a payment system integrated with Midtrans as a third-party platform.
- A dynamic login system with RESTful API management using Go (Gin) and integrated SSO.
- Presenting project.

CERTIFICATIONS

Top 30 National Team – Jagoan Hosting Infra Competition

Nov 2025

Organized by Jagoan Hosting – National Scale Infrastructure & Cloud Competition.

National Semi-Finalist – Jagoan Hosting Infra Competition

Nov 2025

Organized by Jagoan Hosting – Selected from 1,200 participants and 300 teams throughout Indonesia.

Finalis Web Programming FITCOM – Universitas Dinamika Surabaya

August 2024

Organized by Dinamika University Surabaya – Selected as a finalist in the competition from 30 teams throughout Indonesia.

SKILLS & INTERESTS

Technical Skills: PHP, JavaScript, Golang, Java, Laravel, CodeIgniter, React.js, Next.js, Express.js, Gin, Gorm, MySQL, PostgreSQL, Supabase, Git, REST API, Database Design.

Soft Skills: Teamwork, Adaptability, Time Management, Problem Solving.

Interests: Web Development, Backend Development, Basis Data, Scalable System.

LANGUAGES

Indonesian: Native Speaker

English: Intermediate Level
